- **Tools & Platforms:** Git, GitHub, Visual Studio Code, Chrome DevTools (Lighthouse, Network, Console)
- **Other Skills:** Problem Solving, Software Testing, Graphic Design, Team Collaboration, Client focus

PROJECTS

FinTrack | *Personal Finance Tracker Website*

[GitHub](#) | [Live Demo](#)

Project Overview: A responsive web application designed to help users track income, expenses, and savings through an interactive and user-friendly financial management dashboard.

- Built a responsive personal finance tracker web application using HTML, CSS, Bootstrap, JavaScript, and jQuery to manage income and expenses efficiently.
- Developed interactive features for adding, updating, and tracking financial records with real-time calculations.
- Improved user experience by designing a clean, mobile-friendly dashboard for better financial visibility and usability.

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript (ES6+), jQuery

WonderLux | *Premium Travel Agency Website*

[GitHub](#) | [Live Demo](#)

Project Overview: A modern and responsive travel agency website showcasing luxury travel packages, destinations, and tourism services with a focus on user experience.

- Built a responsive travel website with structured service and destination sections to enhance user engagement.
- Designed visually appealing layouts using Bootstrap for seamless cross-device compatibility.
- Improved expertise in UI/UX design, responsive web development, and website structuring.

Technologies Used: HTML5, CSS3, Bootstrap

MINI PROJECTS

NeuroFlash | *Simon Game Pro*

[GitHub](#) | [Live Demo](#)

Project Overview: Built a memory-based Simon game to improve logic-building and user interaction through sequence-based gameplay. Implemented event-driven programming and real-time input validation to enhance interactivity and game performance.

Technologies Used: HTML5, CSS3, JavaScript, jQuery

Roll Royale | *Dice Game Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Developed a responsive dice game to practice JavaScript logic, DOM manipulation, and interactive UI behavior. Implemented random number generation and dynamic result updates to create an engaging browser-based game experience.

Technologies Used: HTML5, CSS3, JavaScript
